

Map and Orchestrate Physical
and Software Supply Chains

Meet Exiger

Cutting-Edge Risk
Management Solutions.

Award-Winning
Procurement Technology.

EXIGER

Making the world a safe and transparent place to succeed.

Exiger provides the only supply chain management solution to help companies and government agencies monitor open-source third-party risk and achieve cost savings, resilience and compliance in real-time.

5B+

Pounds of tracked goods traced back to their original source

51M

Sanctions, UFLPA and other watchlist records reported in 2024

7B

Source records of supply chain installations

- Exiger helped the Federal Government avoid **\$500M** in fraud and waste, quickly vetting critical medical suppliers during the height of the Covid-19 crisis.
- Exiger conducted **3M** assessments to uncover ESG risk, forced labor, cyber vulnerabilities and threats to national security.
- During inflation and economic volatility, Exiger helped its customers achieve over **\$1B+** in cost savings.

The world is outsourced.

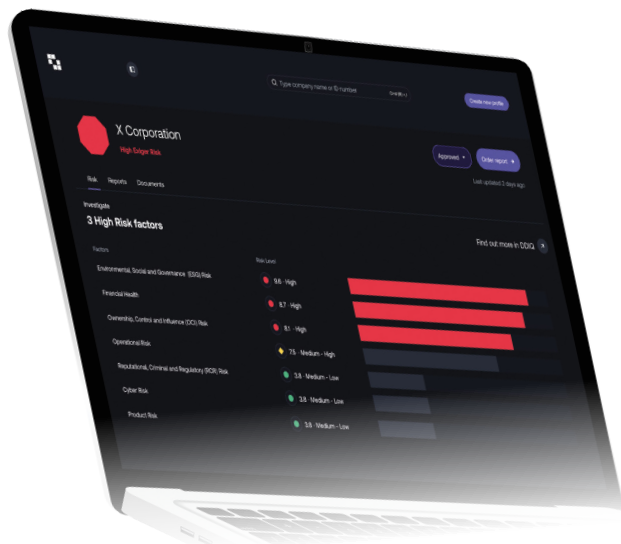

The products you make, the software you use, and the materials you buy form a complex and interdependent supply chain. Managing this complexity is challenged by the convergence of responsibilities across engineering, procurement, supply chain, and compliance teams—functions that often lack the connectivity needed to collaborate effectively.

“

OVER 90% OF THE COST TO BUILD AN AUTOMOBILE IS FROM PARTS MANUFACTURED OUTSIDE OF OUR ORGANIZATION. THIS MEANS LESS THAN 10% OF THE COST SITS WITHIN OUR DIRECT CONTROL.

”

Nissan Supply Chain Executive

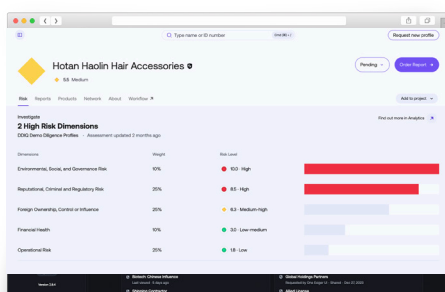

Interconnected risks create vast and unpredictable scenarios.

A single supplier decision requires a complex and endless waterfall of risk-weighted decisions across teams to optimize a supply chain. Multiply this by thousands of suppliers in a serial production scenario and your decision complexity explodes.

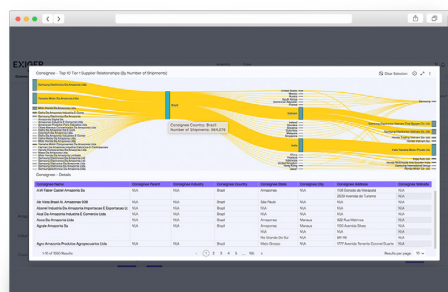

1Exiger: The Digital Thread for Cross-Functional Risk Management1

1Exiger unifies supplier, product, part, and material data to form a single digital thread that connects cross functional teams. Combined with our risk model, this helps you prioritize risks, assess vulnerabilities, and monitor threats while mapping and orchestrating compliant, resilient supply chains.

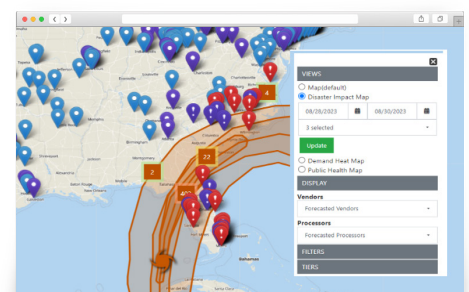

PRIORITIZE RISKS

ASSESS VULNERABILITIES

MONITOR THREATS

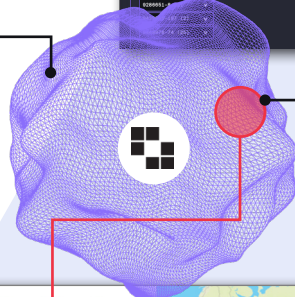

Visualize, Assess, and Act

STEP 02

Visualize Multi-Tier Relationships

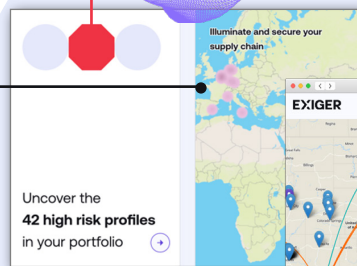

Using its relationship knowledge graph, 1Exiger maps supply chains to the nth tier, connecting suppliers, products, parts, and raw materials.

STEP 04

The Whole Picture in One Pane

1Exiger visualizes value chains, flagged risks, and material forecasts in a unified platform.

STEP 01

Create the Digital Twin

1Exiger systematically constructs Bills of Materials (BOMs) from various inputs, including product descriptions, STEP 02 TDPs, HBOMs, and technical drawings.

STEP 03

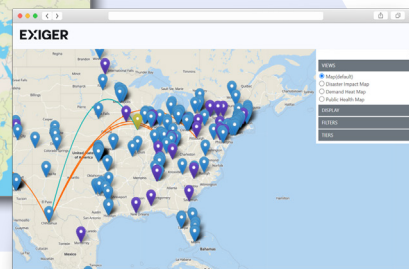

Leverage Context for Clarity

With a complete digital twin of your supply chain, 1Exiger's risk model categorizes and prioritizes identified risks according to your risk appetite.

STEP 05

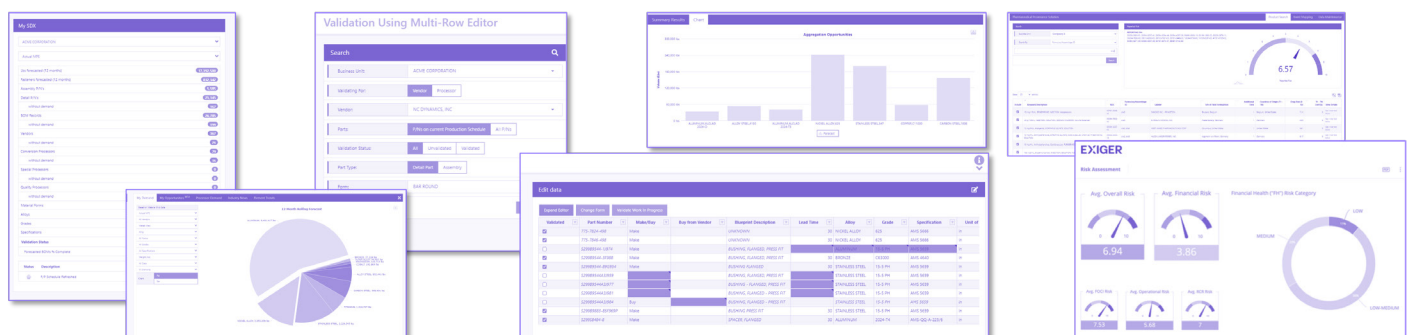

Drive Action Through Integration

Integration with ERP, PLM, and sourcing systems eliminates data silos. Customizable workflows enable you to act directly in 1Exiger.

Turn risk into reward.

Tie decisions made within 1Exiger to measurable value, delivering clear ROI for your organization.

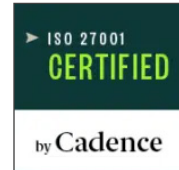

Detect supply chain disruptions **before** they occur and automatically find alternatives.

Comply with regulations like UFLPA, Section 889, CSDDD, EUDR, EO14028, and more.

Ensure continuity of supply and reduce cycle times up to **40%**.

Use predictive risk analytics to drive up to **22%** landed cost savings.

Security is at the Core of Everything We Do

Doing Well by Doing Good

Exiger is proud to partner with leading nonprofits and NGOs, equipping global charity leaders with the same tools that major Fortune 500 companies and government agencies are using to gain insights and visibility into their supply chains.
